WORK EXPERIENCE

Frontend Developer, *MoniePlug*

August 2 - Present

As a Frontend Developer and Co-Founder of Monieplug, I am responsible for developing and maintaining responsive web and mobile interfaces from Figma designs, integrating APIs, managing dynamic data, and ensuring smooth, user-friendly experiences through clean, reusable code and close collaboration with designers and developers.

Frontend Developer Instructor, *CodingKids Academy*

January 2025 – Present

I teach college students HTML, CSS, JavaScript, and React, focusing on building strong coding foundations through practical lessons and real-world examples. I conduct live sessions and coding challenges, and I also share my own code with them to practice and improve. Along the way, I provide feedback and guidance to help strengthen their problem-solving skills and development abilities.

Frontend Developer Intern, *FlexiSAF Edusoft Limited, Nigeria*

May 2024 – September 2024

I was able to build real-world projects where I learned React, the React ecosystem and how it functions, plus Bootstrap and SaaS.

PROJECTS

Healthify

Description: Healthify is a user-friendly healthcare platform that connects patients with hospitals, enabling seamless discovery of medical providers and online booking of appointments. With Healthify, users can search for hospitals, view available time slots, and schedule appointments-all in one place.

Technologies: Next.js, TailwindCSS, Supabase.

Live: <https://healthify-umber.vercel.app>

Yotomi Supermarket

Descriptions: A full-featured online platform offering easy shopping, secure checkout, and comprehensive order management for a smooth customer experience.

Technologies: Next.js, TailwindCSS, Responsive Design.

Live: <http://yotomi-supermarket.vercel.app>

Portfolio Website

Description: A portfolio website built for a creative client. This website features comprehensive service listings, interactive gallery showcasing their work, and custom animations to enhance user engagement.

Technologies: Next.js, TailwindCSS, Custom Animations.

Live: <https://enoch-pi.vercel.app>

ReadEvolve - Personal Reading Companion

Description: Comprehensive book-tracking application with personalized recommendations, reading progress monitoring, and social features for book enthusiasts.

Technologies: React, Gluestack UI

Live: <https://read-evolve-app.vercel.app>
